# About Us

---

BioThread Dental has expanded its services; now offering Regenerative Solutions to our doctors. We work exclusively with AATB certified Bone and Tissue Banks based in Montana, Texas, and Tennessee. Currently, we have a 99% fill rate on orders and strive to provide excellent service.

BioThread was founded by Doctors and Clinicians that have worked in all kinds of practices and settings, much like the ones you are currently at today. We understand the importance of choosing a quality product, and the continuous struggle between staying competitive and still being profitable. For this reason, we invested our resources into the 5 most recognizable bone marks around the world; which to make it even better, are located in our very own USA.
